

Recd Team Contract

Expected level of achievement and effort for each team member

We are all aiming for an A- on the project. We will strive to contribute equal amounts of time and effort to the project, which we'll try to do by dividing up tasks evenly.

Personal goals for each team member

Rena - Practice good web development paradigms, and become more comfortable creating web apps.

Elysa - Learn React! Work on separation of concerns.

Casey - To learn React. To become more fluent in best practices in web app development.

Dora - Work on best practices, separation of concerns, learn how to use React

Frequency, length and location of team meetings

At least 1 hour long meeting per week in Maseeh. We will add additional team meetings as necessary.

How quality of work will be maintained

We will do code review. At least one person will review the code that someone else writes.

How tasks will be assigned, and what to do if deadlines are missed

We will create a spreadsheet to assign tasks to specific members and keep track of deadlines.

Team members can indicate when they are done with tasks. If someone cannot reach a deadline, she should notify team members at least a day in advance. We will extend deadline/help finish task as a team.

How decisions will be made and disagreements resolved

Decisions will not be made unilaterally. We will discuss conflicts as a team until we converge on a resolution.
