- Demo
  - Homepage: table, pins, click on pin
  - My Events: create, edit, cancel events
  - Create Event Page: datepicker not completely functional, but can create event, select location dropdown doesn't change but works
  - Edit event page: has pre-populated fields and can change them
- Bootstrap
  - Not loading other resources from server (from client side)
  - Client side routing - follows a # in url
  - Server does not have /myEvents page
- This wed - Revision
  - Revise design doc (will get feedback tonight)
    - Data model, or anything else we changed - just update to reflect what we have done
- Feature freeze (final demo / mostly functional demo)
  - Goal is to be working on appearance and small bugs
  - Most of functionality (groups, filter) should be done by then
- Start on documentation and testing!!!
