Goals for MVP

Allowing users to create/publicize events and to find events on a map will fulfill the main purpose of mapMIT. Here are the concepts and functionalities we will include in our MVP to reach this goal.

- Concept: Event
  - Users should be able to create, edit, and delete public events
- Concept: Location
  - Public events should be properly displayed on interactive map
  - Hover action on map pins should display event details

Issues Postponed

- Concept: Groups
  - Users will be able to create, join, and remove groups
  - Users can make events they created group-specific
- User authentication
- Functionality for users to "report" events
- Implementation of filters on homepage
